

**LOCATIONS**

SYRACUSE, NY | LITTLE FALLS, NY | SHELL ROCK, IA | MONTGOMERY, AL | FERNLEY, NV

---

**Job Title:** Industrial Maintenance

**Reports To:** Facilities Manager

**Classification:** Non- Exempt

**Pay Range:** 19.00- 31.50

**Job Summary:**

As a full time Industrial Maintenance Technician, you will work hands-on with robotics, manufacturing machinery and help with process improvements. The industrial maintenance technician is responsible for the ongoing maintenance of all production manufacturing machinery to include troubleshooting and completion of required preventive maintenance.

**Essential Functions of Position:**

- Install, inspect and maintain machines and electrical equipment and carry out preventive maintenance to ensure that industrial machines remain operational.
- Maintain all company equipment in top working condition by scheduling all repairs, keeping up on recommended maintenance and diagnosing any issues that appear.
- Review quality standards of each product to make sure there are no problems; test all materials extensively to analyze how each item meets the standard.
- Make recommendations to company leaders in order to have the best use of production timelines, equipment and supplies; give details about what the company's manufacturing goals should be in the months or years ahead.
- Summarize all data, documentation and information related to the production system in a detailed report for internal use..
- Act as a Liaison with a team of machinery operators, managers and product developers to ensure everyone is contributing to the common goal.
- Develop alternative methods of making manufacturing practices more efficient and cost effective; look at space constraints, material requirements and current needs in order to improve.

**Minimum Qualifications:**

- Ability to operate machinery and technical equipment
- In-depth knowledge of system maintenance
- Ability to lift and move heavy equipment
- Familiarity with safety standards and regulations

**Preferred Qualifications:**
